PROFESSIONAL SUMMARY

Aspiring Product Manager with strong foundations in business analysis and practical HR operations experience. Proficient in translating user needs into scalable product solutions through strategic research, data interpretation, and UX-driven thinking. Passionate about building impactful, tech-enabled products that align with business goals. Actively seeking roles in product or analytics within fast-paced, innovation-led environments.

EXPERIENCE

HR Intern – IXES.ai

- Managed end-to-end recruitment lifecycle: resume screening, candidate evaluation, and interview coordination.
- Streamlined onboarding workflows and maintained HR documentation ensuring compliance with company policies.
- Partnered with HR leadership to optimize talent acquisition processes and elevate candidate experience.

Business Development & HR Associate – Holograd

- Coordinated across marketing, HR, and operations to streamline internal workflows and improve execution efficiency.
- Contributed to lead generation and market outreach aligned with business goals and growth strategies.
- Supported recruitment, employee engagement, and performance tracking to strengthen organizational capability.

PROJECTS

YouTube “Focus Mode” Feature Redesign (Product Management)

Proposed a new “Focus Mode” feature to reduce user distractions and boost engagement. Created detailed PRD, user personas, Figma wireframes, monetization strategy, and A/B testing plan.

HR Attrition Prediction & Dashboard (HR Analytics / Data Science)

Developed an ML-based model to predict employee attrition using real HR data. Built interactive dashboards and generated actionable insights to support retention strategies.

E-Commerce Sales Performance Analyzer (Data Analytics)

Built an end-to-end Power BI dashboard to track regional sales, product trends, and KPIs. Delivered visual insights and business suggestions based on real-time mock datasets.

Customer Churn Prediction System (Data Science / Business Analytics)

Engineered a machine learning pipeline to predict customer churn using real business data. Included EDA, model building (XGBoost), evaluation metrics, and insight reporting.

CERTIFICATIONS

- Product Management (LinkedIn Learning)
- SQL for Data Science (Coursera - certificate optional)
- HR Tech Fundamentals (LinkedIn Learning)
